PRODUCT NAME	ITEM NO.	EXTRA DESCRIPTION
Adhesion carrier disc, double-sided ø 200 mm	95003781	Universal adhesive carrier disc
Adhesion carrier disc, double-sided ø 250 mm	95003607	Universal adhesive carrier disc
Adhesion carrier disc, double-sided ø 300 mm	95003608	Universal adhesive carrier disc

Description	Adherence on both sides, reusable. Suitable for all fixing systems (standard, magnetic)
Material	The ATM adhesion carrier disc is a universal adhesive system, with nano-active surface. No adhesive residues.
Properties	Easy disassembling of the grinding / polishing disc. The adhesive carrier is compatible with: Galaxy grinding and polishing disc, SiC foils, SiC paper (with foiled back), polishing cloths with carrier disc or Galaxy system.
Application	Remove the protective foil(s) from the adhesion carrier disc and put it on a dry and clean platen. Press the SiC foil, grinding or polishing disc onto the adhesive carrier disc. Remove water from the surface, otherwise the disc may slip. The carrier disc works on all polishing machines with standard or magnetic platen. Clean the adhesive carrier disc with water and a wet cloth. Add normal soap, if necessary and dry it with a lint-free cloth afterwards. Plain back SiC paper cannot be fixed on the carrier. Do not stack two carrier discs directly on top of each other without a separating cover. Do not stick self-adhesive consumables directly on the adhesive carrier disc.
Health and Safety	There is no danger to health in the workplace caused by the adhere carrier disc.
Personal protection	No special requirements needed.
Eye protection	No special requirements needed.
Fire protection	No special requirements needed.
Environmental protection	Dispose of waste according to the local regulations.
